

# Thinking Sheet -1

This thinking sheet is designed for improving thinking skills of children of age 12 & above with exposure to practical problems. You can consult with anybody (including machines), search in any book to answer the activities. But give your original answers without fearing for right or wrong answers.

**1** An object/a thing in my home, which came farthest place is \_\_\_\_\_ and distance \_\_\_\_\_ km 

**2** Carpet area of my house \_\_\_\_\_ 

**3** Number of bricks used in my house \_\_\_\_\_   
Clue: get the volume of walls in your house by getting it's dimensions. Then you how many bricks can fit into the volume.

**4** Find out at least three parts, which are present in both flower & Dosa. 

1. \_\_\_\_\_

2. \_\_\_\_\_

3. \_\_\_\_\_

**5** How do you measure the weight of elephant? Think of methods of finding weight of elephant, assuming that the modern weighing bridge is not available. 

This thinking sheet is created by Miyav Learning ([www.miyav.in](http://www.miyav.in)), an organization committed for fostering creative thinking skill levels in school students. Miyav Learning publishes Thinking Tools activity books as a course book for CBSE schools in co-scholastic area.
